Why you should choose a FIFA Preferred Provider

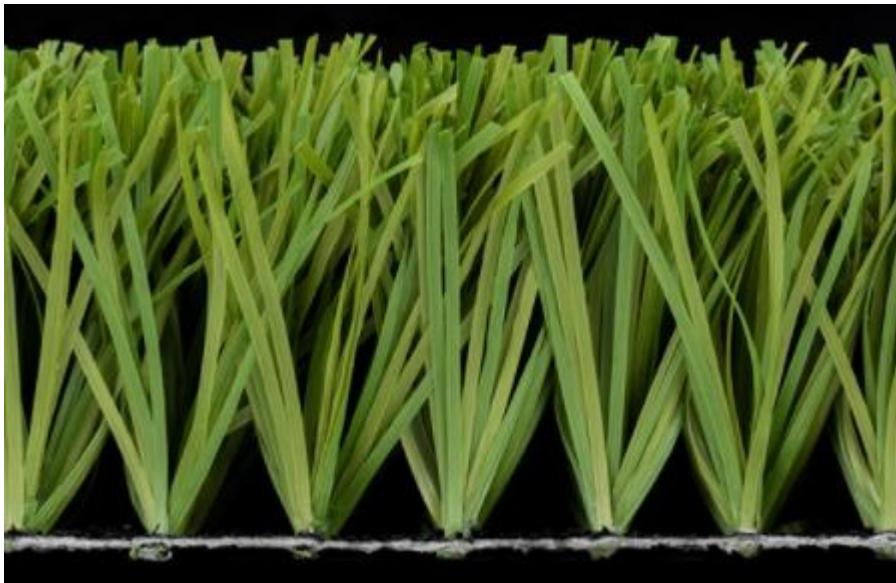

When you purchase a pitch from a FIFA Preferred Provider, high quality and an excellent performance is guaranteed whilst your interest is always protected and prioritised:

1. Artificial turf is manufactured and tested according to [FIFA Quality standards](#).
2. Production facilities are inspected by independent FIFA approved inspectors.
3. An installed pitch is eligible for FIFA Quality or FIFA Quality Pro certification.

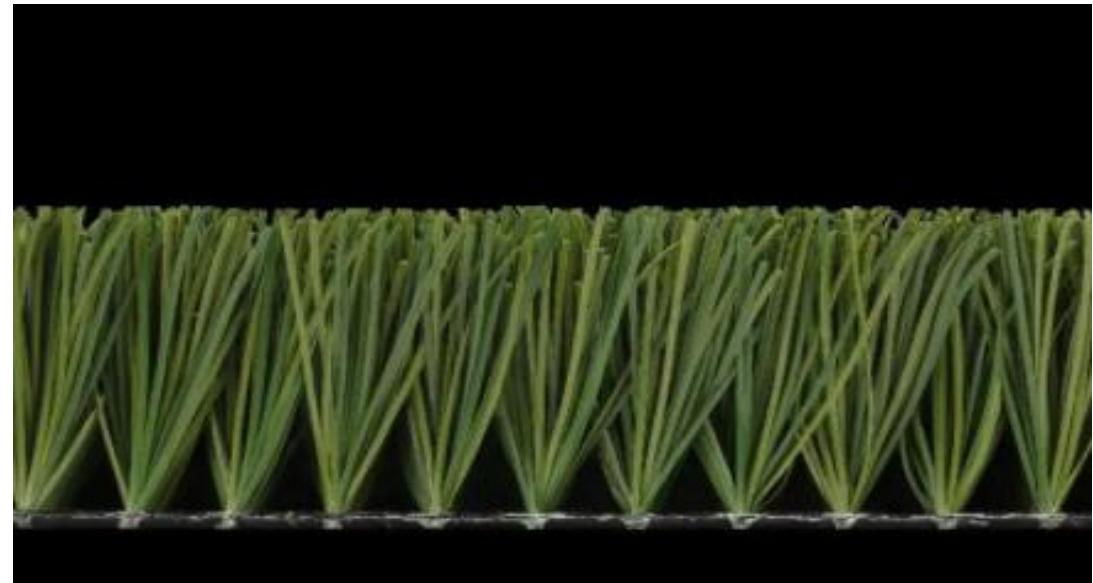

4. Professional support is offered for installation and maintenance.
5. FIFA functions as a partner in case of any inquiries and can be contacted regarding any problems.
6. More opportunities are offered for higher level and larger scale projects.

Recommended Products

Stemgrass™

With a “spine” running through the middle of each blade, Stemgrass is valued for its durability. After 50,000 cycles of Lisport test, it does not show any signs of diverging or splitting. The turf surface is resilient enough to allow natural ball behaviour, give uniform traction and reduce shock to the joints and ankles.

Superb™

Superb™ yarn has an olive shape, with a thickness of 400um – one of the thickest artificial turf products in the market, yet it is extremely flexible and resilient, retaining its “spring back” characteristics over the long-term.

Adhesive For Artificial Turf

Other Surfaces: Artificial & Rubber Turf

Elastan CC6505C-B

- Low volatile organic compounds (VOCs)
- Strong viscosity
- Good weather resistance
- Adjustable curing time

Adhesive for artificial turf seam

As a market and technology leader for polyurethane (PU) solutions, our Elastan® and Elastocoat® series of PU coatings and adhesives, along with a special grade of expanded thermoplastic polyurethane (E-TPU), Infinergy® SP, are applied to a variety of permeable and non-permeable surfaces from athletics stadiums to school fields and playgrounds.
