# RUNNING TRACK

Rubber running tracks provide an safe , non-slip surface for walking , jogging & overall physical fitness.

## SINGLE LAYER RUNNING TRACK

These rubber running tracks are constructed of a large recycled crumb rubber granule that allows rapid drainage , quick drying & storm water.

## DUAL LAYER RUNNING TRACK

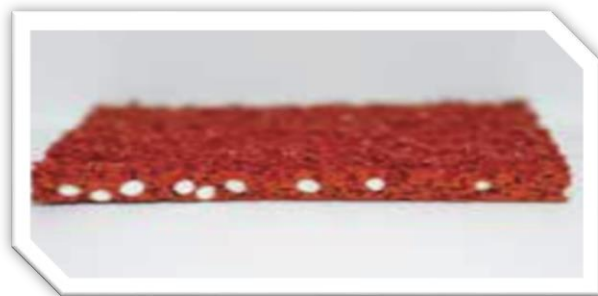

Dual layer running tracks consist of base layer made from 100% recycled post-consumer rubber topped with ½" color wear layer that is colored throughout. This layer ensures a UV resistant , long lasting, colorfast surface. This running track provide safety to joggers and athletes from injuries.

## Product Range

Sports Surfaces: Running Tracks and Walkways

### **Sandwich Impermeable**

#### **SURFACE**

Elastocoat CC8084/1 (Red) or  
Elastocoat CC8085 (Green) & EPDM  
(Sprayed)

#### **PORE SEALER LAYER**

Elastocoat 6120 plus EPDM powder  
or thickening agent

#### **UNDERLAYER**

Binder made with Elastan CC8004 C-  
B series+ EPDM/SBR/ETPU

### **Spray coat Water-permeable**

#### **SURFACE**

Elastocoat CC8084/1 (Red) or Elastocoat  
CC8085 (Green) & EPDM (Sprayed)

#### **UNDERLAYER**

Binder made with Elastan CC8004 C-B  
series+ EPDM/SBR/ETPU

# RUBBER PAVEMENT

The large recycled crumb rubber granulate used in Pavement creates a very porous, open grid surface allowing for rapid drainage and quick drying. This provides valuable filtration, storm water management, and groundwater recharge while also allowing needed sustenance to reach tree and plant roots below ground.

Pavement is resilient enough to provide a low slip, spike resistant, comfortable and safe surface, yet firm enough to be suitable for more high impact use from skateboards, strollers, bicycles, golf carts, and automobiles. This low maintenance system is durable, long-lasting, and resistant to freeze-thaw. A variety Pavement systems have been designed for specific needs and applications.

# RUBBER TILES

We are manufacturing rubber tiles , SBR & EPDM from 2016.  
It let you **create a safe, comfortable, protective floor covering**  
Rubber flooring can be installed easily over nearly any smooth  
surface including concrete, asphalt, wood, or tiles.  
We are having varieties of color:
